

Minnesota Transfer Curriculum (MnTC) Guidelines

All of the following competencies are included in our lower-division general education curriculum. There are ten goal areas.

1. Communication

To develop writers and speakers who use the English language effectively and who read, write, speak, and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking, and discussion.

2. Critical Thinking

To develop thinkers who are able to unify factual, creative, rational, and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum in order to develop students' awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems.

3. Natural Sciences

To improve students' understanding of natural science principles and of the methods of scientific inquiry, e.g., the ways in which scientists investigate natural science phenomena. As a basis for life-long learning, students need to know the vocabulary of science and to realize that, while a set of principles has been developed through work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today's scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students are encouraged to study both the biological and physical sciences.

4. Mathematical/Logical Reasoning

To increase students' knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments, and detect fallacious reasoning. Students will learn to apply mathematics, logic, and/or statistics to help them make decisions in their lives and careers. Minnesota's public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra.

5. History and the Social and Behavioral Sciences

To increase students' knowledge of how historians and social and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events, and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

6. The Humanities and Fine Arts

To expand students' knowledge of the human condition and human cultures, especially in relation to behavior, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy, and the fine arts, students will engage in critical analysis, form aesthetic judgments, and develop an appreciation of the arts and humanities as funda-

mental to the health and survival of any society. Students should have experiences in both the arts and humanities.

7. Human Diversity

To increase students' understanding of individual and group differences (e.g., race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States' historical and contemporary responses to group differences.

8. Global Perspective

To increase students' understanding of the growing interdependence of nations and peoples and develop their ability to apply a comparative perspective to cross-cultural social, economic, and political experiences.

9. Ethical and Civic Responsibility

To develop students' capacity to identify, discuss, and reflect upon the ethical dimensions of political, social, and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others' positions, be part of the free exchange of ideas, and function as publically-minded citizens.

10. People and the Environment

To improve students' understanding of today's complex environmental challenges. Students will examine the interrelatedness of human society and the natural environment. Knowledge of both biophysical principles and sociocultural systems is the foundation for integrative and critical thinking about environmental issues.

The following pages list Anoka-Ramsey courses that are acceptable in each goal area. Updated lists are available on both campuses, and online at: Anokaramsey.edu/academics/minnesota-transfer-curriculum/

Minnesota Transfer Curriculum (MnTC)

The Minnesota Transfer Curriculum (MnTC) is an agreement between Anoka-Ramsey Community College, Minnesota State schools, and the University of Minnesota. The MnTC will transfer as a "package" to any Minnesota State school, the University of Minnesota system, and some private schools upon completion and documentation on students' transcript, which will be updated at the end of each term. Students must **fulfill the 10 goal areas, complete 40 credits from those listed below, and maintain a cumulative 2.0 GPA for the entire MnTC. Grades of A, B, C, and D are accepted within the MnTC.** Courses with a superscript (e.g.: ENGL 1121²) satisfy more than one goal area. The credits are only counted once towards the 40-credit requirement. The number of credits is noted in parenthesis next to the course.

Goal 1: Communication. Two courses required: one from A and one from B.		
A. Written (one course required): ENGL 1120 ² <i>Cross-Current College Writing and Critical Reading</i> (4) ENGL 1121 ² <i>College Writing and Critical Reading</i> (4)	B. Oral (one course required): CMST 1110 ² <i>Introduction to Communication</i> (3) CMST 2215 ² <i>Public Speaking</i> (3) CMST 2220 ⁷ <i>Interpersonal Communication</i> (3)	C. Other (no course required, but counts toward 40 credits): CMST 2251 ² <i>Small Group Communication</i> (3) ENGL 1104 ² <i>Technical Writing</i> (3) ENGL 2241 ⁶ <i>Introduction to Creative Writing</i> (3) ENGL 2251 ⁶ <i>Creative Writing for Stage and Screen</i> (3) ENGL 2261 ⁶ <i>Creative Nonfiction Writing</i> (3) ENGL 2262 ⁶ <i>Poetry Writing</i> (3) ENGL 2263 ⁶ <i>Fiction Writing</i> (3) ENGL 2271 ⁶ <i>Creative Writing for Children and Young Adults</i> (3) MCOM 2121 <i>Media Writing</i> (3) MCOM 2131 <i>Reporting, Writing, and Editing for Online Publications</i> (3)
