

## Calculator

What is the area of the region in the first quadrant enclosed by the graphs of  $y = \cos x$ ,  $y = x$ , and the  $y$ -axis?

- (A) 0.127      (B) 0.385      (C) 0.400      (D) 0.600      (E) 0.947

$$\int_{0.400}^{.739085} (\cos x - x) dx$$

## 7-3 day 1 Volumes: Disc Method

### Learning Targets

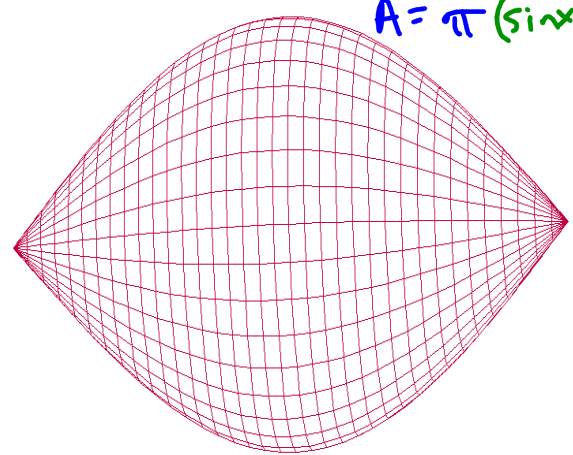

I find the volume of a solid that has been rotated around an axis using the disc method.

# Discs

Ex1. Find the volume of the solid formed by revolving the area in the first quadrant bounded by  $f(x) = \sin(x)$ , the x-axis and  $x = \pi$  around the x-axis.

$r = \sin x$   
 $A = \pi r^2$   
 $A = \pi (\sin x)^2$

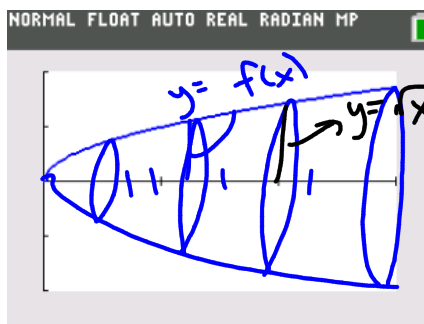

$$V = \int_0^{\pi} \pi (\sin x)^2 dx$$

$V \approx 4.935 \text{ units}^3$

Ex2. Given the function  $f(x) = \sqrt{x}$

a.) Find the volume of the solid formed by revolving the area bounded by  $f(x)$ , the x-axis and  $x=3$  around the x-axis.

$$\int_0^3 \pi (\sqrt{x})^2 dx = \int_0^3 \pi x dx = \boxed{14.137} \text{ ||}$$

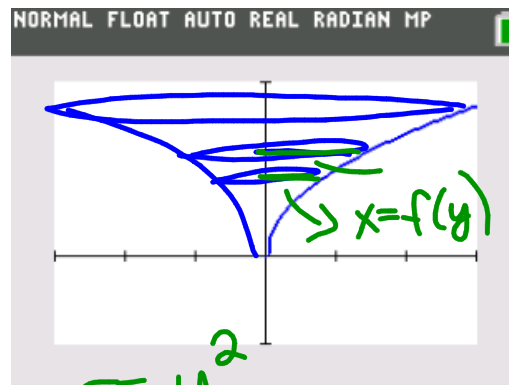

$$= \frac{\pi x^2}{2} \Big|_0^3$$

$$\frac{\pi (3)^2}{2} - \frac{\pi (0)^2}{2}$$

$$= \boxed{\frac{9\pi}{2}}$$

b) Find the volume of the solid formed by revolving the area bounded by  $f(x)$ , the  $y$ -axis and  $y = \sqrt{3}$  around the  $y$ -axis.

$$y = \sqrt{x} \quad x = y^2$$

NORMAL FLOAT AUTO REAL RADIANT MP

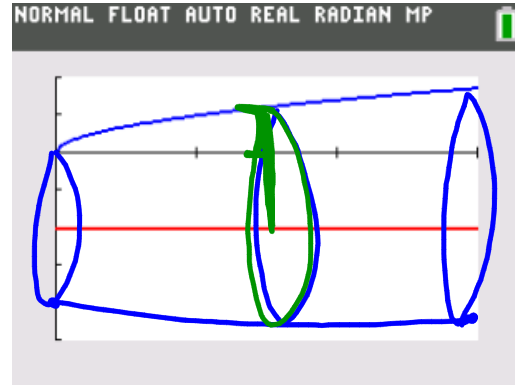

$$\int_0^{\sqrt{3}} (\pi y^4) dy$$

9.794516567

$$\begin{aligned} &= \int_0^{\sqrt{3}} \pi (y^2)^2 dy \\ &= \int_0^{\sqrt{3}} \pi y^4 dy \\ &\approx 9.795 \end{aligned}$$

c.) Find the volume of the solid formed by revolving the area bounded by  $y = \sqrt{x}$ , y-axis,  $x = 3$  and  $y = -2$  around the line  $y = -2$ .

$$\sqrt{x} + 2$$

$$r = \sqrt{x} + 2$$

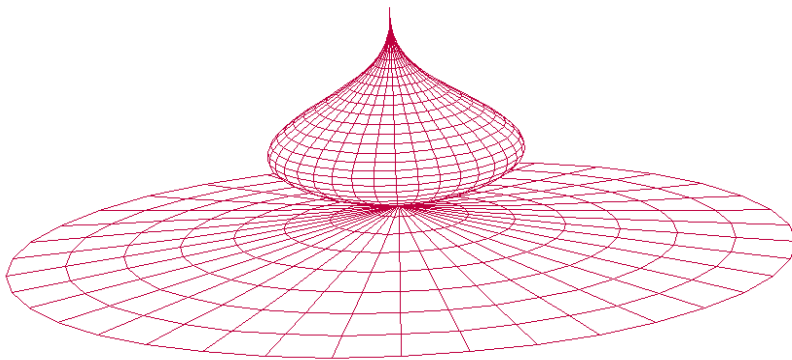

$$\int_0^3 \pi (\sqrt{x} + 2)^2 dx \approx 95.367$$

$$\frac{167962}{5533} \pi$$

Ex3. Find the volume formed by revolving the shaded area around the x-axis.
