

Agenda:

1. section 2-1

Today you will need:

- > highlighter
- > pencil

Housekeeping:

1. SHOW WORK on all problems
(in assignments, quizzes & tests)

Assignment due Wednesday:

- > Pearson 2-1 online
#15-17

Learning Target 2-1

I can determine the names of the angles formed when lines are intersected by a transversal.

*learn \angle pair
names

IDENTIFYING ANGLES FORMED BY TRANSVERSALS

- **transversal**- line that intersects 2 or more coplanar lines at different points

- **corresponding angles**- same spot, on the same side transversal

$$\angle 1, \angle 5 \quad \angle 6, \angle 2$$

$$\angle 4, \angle 8 \quad \angle 7, \angle 3$$

- **alternate interior angles**- alternate sides along the transversal, inside black lines

$$\angle 3, \angle 6 \quad \angle 5, \angle 4$$

- **alternate exterior angles** alternate sides of the transversal, on the outsides of the black lines

$$\angle 8, \angle 1 \quad \angle 7, \angle 2$$

- **consecutive** same side interior angles inside the black lines, on the same side of the transversal

$$\angle 6, \angle 4 \quad \angle 3, \angle 5$$

Ex 1: List all pairs of angles that fit the description.

a. corresponding

$\angle 1, \angle 3$ $\angle 2, \angle 4$

$\angle 5, \angle 7$ $\angle 6, \angle 8$

b. alternate exterior

$\angle 4, \angle 5$ $\angle 1, \angle 8$

c. alternate interior

$\angle 6, \angle 3$

$\angle 2, \angle 7$

d. same side interior

$\angle 2, \angle 3$ $\angle 7, \angle 6$

* Don't forget about...

- linear pairs ($\angle 4, \angle 8$ $\angle 3, \angle 4$)

- Vertical angles ($\angle 3, \angle 8$ $\angle 4, \angle 7$)

What will my Pearson window look like?

assigned problem

15-17

2.1 12

What error did Tyler make?

$m\angle 1 = 72$ by Same-Side Exterior Angles Theorem **X**

While there is no Same-Side Exterior Angles Theorem given, same-side exterior angles are

the number in the series/set

2.1.15

Que:

Identify a pair of same-side interior angles.

Choose the correct answer below.

- ☐ A. $\angle 4$ and $\angle 7$
- ☐ B. $\angle 3$ and $\angle 8$
- ☐ C. $\angle 2$ and $\angle 7$
- ☐ D. $\angle 3$ and $\angle 2$

Click to select your answer and then click Check Answer.
