

## **GIANT** puppet **PROJECT**

Due

### **What you are to do....**

1. Get into groups of three
2. Draw out what you want your puppet to look like
3. Decide how you will make your puppet (I have given you one example that you can work from or create a whole new plan. The handout is simply a suggestion.)
4. Make certain that the idea for your puppet is at least for a **5 foot** tall puppet.
5. Gather recycled goods or things you might find lying around (try to avoid buying anything).
6. Build your puppet.
7. Create a small (three minute) presentation that explains to the class the inspiration for your puppet and how your group ultimately created it. Lastly, share with us what worked and didn't work well in your construction plans.

*\*\*\* Please use your in class time wisely so that you avoid having to meet outside of class \*\*\**
