Radio Show Project

Goal: To produce and record an "old time" radio program.

Requirements:

1. You will be divided up into three even groups.
2. As a group, brainstorm and decide on a story idea.
3. Divide into writers, actors and sound effects people (some of you may have to do more than one task or may want to do more than one task).
4. You will be graded on how well you use your **IN CLASS** work time.
5. Write the script, which must be between 10-15 minutes long (that works out to be about 10-15 typed pages). The script can be typed or hand written. I can make photocopies of your scripts for your whole group.
6. The script should follow a story line with super objectives and conflict.
7. Gather sound effects.
8. Be well rehearsed!
9. Actors should create voices that are appropriate to her/his characters. If an actor plays more than one role they should have a **VERY** different voice for **EACH** character.
10. Work on clear articulation and enunciation (avoid popping consonance.)
11. Make certain that you have timed your script so that it is the required length (10-15 minutes).
12. You will present your shows to the class as if it *were a live radio broadcast!*

After everyone has recorded their shows we will sit around the radio and listen, just like the old days!

SHOWS ARE DUE -
