Acquisition	
Knowledge - Students will: <ul style="list-style-type: none">Identify actions related to resident safetyIdentify situations which require emergency actionDescribe principles of body mechanicsDescribe principles of infection controlDescribe standard precautions for infection control practicesDescribe transmission based precautionsIdentify common pathogens and resulting diseasesDescribe standard pre and post steps for resident care skillsDiscuss admission and transfer procedures Reasoning - Students will: <ul style="list-style-type: none">Describe the safety of the residents	Skills - Students will: <ul style="list-style-type: none">I can demonstrate skills for a safe and clean environment:<ul style="list-style-type: none">hand washingresident unit orderunoccupied bed makingtransfer belt placementclear obstructed airway on conscious patientgown, glove and bag linen

Common Misunderstandings

- Infection v contamination
- What entails a hazard
- Disinfection v sterilization

Essential new vocabulary

- Alcohol-based hand rub
- assistive device
- body mechanics
- body alignment
- chain of infection
- contaminated
- disinfect
- gait belt
- hand hygiene
- HIV
- host
- infection
- infection control
- intact
- isolation
- medical asepsis
- microorganism
- pathogen
- physical restraint
- PPE
- safety
- sputum
- standard precautions
- sterilization
- transmission
- transfer belt
