

Tic-Tac-Toe:

(works on 1 more/1less, 10more/10less)

Partners. Each partner needs a different color to write with.

Flip a coin or roll a die to see who goes first.

Use 120 grid as support if needed)

*First person. Pick any # from 23 to 93. Record it on to the tic tac toe board in the middle box. This board can be drawn on paper or whiteboard.

*Second person, choose a box to write in. Once the box is selected the child needs to figure out what number would go in that box based on the 1st persons given number. If it is in front or before it is 1 less. If it is after, it is 1 more than the given number on the board. If it is above it is 10 less. If the box is below then it is 10 more. Goal is to get 3 of your color of numbers in a row, just like tic tac toe.
