

## What's Under My Thumb:

(works with counting and non-counting strategies)

Use the paper dominoes to play this game. Place the dominoes in a pile face down. Then Mom/Dad pick a domino without you seeing it and figure out what the sum is by adding both sides of the domino. Next mom/dad should put his/her thumb over one side of the domino so it is hidden from you so you can only see one side, and he/she should say “\_\_\_\_\_ is the sum. What's under my thumb? You figure out how many dots are under the thumb.
