

Joke Is On You!:

Use 10 number cards from a sequence that needs practice. Also include one card that says Joker or Wild. Shuffle cards then lay the cards face down in a row. Pick one card find its correct position in the row or line. The card occupying that place is picked up and given to yourself and the first card you selected is to be placed in its correct position in the line. Continue this until the Joker is revealed. The child then has to name the numbers that are missing from the sequence. This can be done with forward counting or backward counting.
