

**Solitaire:** (Use the 5 or ten frame or number cards with 4-sets of a number)

Pick a target number 4, 5 or 10. Example 10. Next lay the 5 or 10 frame cards face up in a 3x3 array. Keep passing out the cards (making 9 piles) until you run out. Remember the cards are face up. The goal is to find matching pairs to make ten (8,2). You can only remove the top cards. You cannot pull cards out from underneath the top cards. When you can't make any more pairs the game is over. If this is too tricky with number cards use the 5 or 10 frame cards. This can also be played with 2 players. Whoever collects the most cards at the end is the winner.
