

Take Your Place! (id & ordering) Need 2 dice.

Arrange one of the dice so it shows 1 dot. Keep it on a one throughout activity. Roll the other dice to create a 2 digit number in the tens family. Or put one of the dice on the 2 dot to focus on 2-digit numbers in the 20s family. It depends on what numbers you want to practice identifying and ordering. Player 1 rolls 1 die to create a 2-digit number, identifies it. Player 2 does the same. Mom/Dad ask “Which is more 12 or 16? Where should 12 be?” Player 1 rolls again. Ask: “Is it higher or lower than 16? Where should it go? Continue until you have 5 numbers created. Read each number and check to be sure they are in order.
