

Fantastic Fours, Fun Fives or Tantalizing Tens!

(Use 5 or 10 frame cards)

Choose a target number like 4, 5 or 10 and pull that particular number out of the deck. Put all the cards face down into one pile. Pick a card. Count how many dots you would need to add to the frame to reach the target number, or count how many dots needed to be taken off the frame to make the target number. If correct keep the card. When you get 15 cards your done. Try another target number. Have fun.
