### TECH. ED. DEPARTMENT POLICIES

- No hats or jackets are to be worn or brought to class
- No computer games to be played at all.
- No **CD PLAYERS, IPODS or CELL PHONES** are allowed in class
- No **POP or SODA**, or any other beverage to be brought to class
- If the teacher is speaking – students are listening
- Any student turning in an assignment that breaks school policies on content will be given a referral to the office. –
- Tardies – you will be held accountable to the Coon Rapids High School's policies
- Working outside of the school day see your teacher for availability.
- **In some Tech. Ed. Courses there will be upgrades in materials that will need to be paid for (above base material or required).**

### TECH. ED. GRADING POLICIES

- A – 100% - 90%
- B – 89% - 80%
- C – 79% - 70%
- D – 69% - 60%
- F – 59% or below
  - **Grades will consist of tests, quizzes, activities, assignments, participation and attendance.**

## **TECH. ED. MATERIALS NEEDED EVERYDAY**

- Pen or Pencil
- Folder
- Notebook
- Thumb Drive for computer classes
- Appropriate clothing for work in class – See instructor for complete list of appropriate clothing as different classes have different requirements.

### **Out of Class Work**

Most assignments will be completed in class. Therefore attendance is a must!!!!

## **Woods 3, 4**

### **Course Description:**

This course is designed to give the students skills and knowledge of woodworking. Students will develop skills through hands on experiences. An understanding of operations, equipment, and techniques used in woodworking will be learned through lectures, demonstrations, and hands on experiences.

### **Course Content:**

The course will cover the following areas: Safety, equipment, materials, and techniques used in woodworking. The student will complete at least 1 project of the students design. The students will plan, document, and build the project. Students will also produce 1 part to their project on the CNC router designed in Master Cam, required.

### **Course Outcomes:**

- \* Upon completion students will be able to safely perform multiple operations using various pieces of equipment in the shop.
- \* Upon completion students will be able to demonstrate an understanding of various finishes for wood projects by finishing their projects.
- \* Upon completion students will be able to follow a set of plans to make a project.

### **Additional Materials Needed For Class:**

- \* Students will pay for any materials that they use in their projects. Students will not be able to start making their project until at least half of the cost of any materials is paid through shop cards. Shop Cards can be purchased in the financial office which is in the main office. Cards must be purchased before or after school.
- \* It is recommended for the students to have their own tape measure. Students that have their own tape measure often have their project turn out better and complete it sooner.
